FIGURES OF THE OPERATING LEASE SECTOR (STOCK-CLIENTS-REGISTRATIONS) in 2022

## Operating leases close the year with a $7.15 \%$ increase in the stock of vehicles and of 3.91\% in clients

- The stock of operating lease vehicles as of closing of 2022 amounts to 853,644 vehicles and increases by 7.15\% with respect to 2021
- 258,527 clients are accounted for-including individuals and entities- with an increase of 3.91\% on the previous year.
- Turnover reaches 7,426 million euros, 11.65\% over the previous year.
- Operating leases represents 22.66\% of total registrations versus 25.27\% in 2021.
- Vehicles powered by alternative energies take 32.09\% of the total of operating lease registrations when in 2021 they were of 29.15\%.
- 26.33\% of operating lease vehicles registered in 2022 came from a Spanish factory with respect to 20.88\% of the rest of registrations not including operating leases.

Madrid, 25 January 2023
Asociación Española de Renting de Vehículos has issued today the full figures (stock, clients and registrations) of the evolution of operating leases in our country in 2022. In total, the stock of operating lease vehicles reaches 853,644 vehicles, which means an increase of $7.15 \%$ with respect to 2021.

The number of operating lease clients amounts to $\mathbf{2 5 8}, 527$ representing an increase of $\mathbf{3 . 9 1 \%}$ with respect to 2021 , i.e. 9,718 more.

The shortage of vehicles due to problems in their manufacture meant that demand could not be met by new clients and individuals (self-employed and individuals) despite they continue to grow (4.35\%) they lose weight in the operating lease fleet; and therefore their penetration is of $16.36 \%$ versus $16.80 \%$ as of closing of 2021. The weight of self-employed and individuals in the number of clients is of 52.02\% and increases by 4.75\%.

Small companies (with up to four vehicles) raise the operating lease stock by $7.16 \%$ and place their stake at $23.14 \%$ increasing clients by $2.52 \%$.

Medium-size companies register an increase of $\mathbf{7 . 3 8 \%}$ in stock with a stake of $\mathbf{1 7 . 6 1 \%}$ and an increase of $6.23 \%$ in the number of clients.

For its part, big companies are the ones with higher increases of stock of operating lease vehicles an $\mathbf{8 . 1 6 \%}$ with a burden of $\mathbf{4 2 . 8 9 \%}$ with a raise in clients by $6.60 \%$.

As per registrations, as it was already published, the number of registrations in 2022 has been of 254,948 units, which means a fall of $\mathbf{2 . 2 6 \%}$ with respect to the closing of 2021.

The weight of operating leases in the total of registrations in Spain is of 26.66\% vs. 25.27\% in 2021.

ASOCIACIÓN ESPAÑOLA DE RENTING DE VEHÍCULOS

Vehicles powered by alternative energies represent $32.09 \%$ of registrations and it is already estimated that there is a stock of e-vehicles close to $\mathbf{7 0 , 0 0 0}$ units which represents $8.2 \%$ of the total of the operating lease stock.

The turnover of the sector in 2022 is of $\mathbf{7 , 4 2 6}$ million euros, $\mathbf{1 1 . 6 5 \%}$ more than in 2021. Regarding the investment in the purchase of vehicles, it amounts to $\mathbf{5 , 6 3 4}$ million euros, $\mathbf{0 . 2 0 \%}$ more than in 2021.

The average term of contracts in 2022 has been of $\mathbf{4 6 . 7 9}$ months with respect to 46.95 in 2021.

José-Martín Castro Acebes, President of Asociación Española de Renting de Vehículos values the results of the operating lease sector: "Just as 2021 was a very complex year with respect to management, the recently ended 2022 has continued in this same line. The crisis of semiconductors and its impact on industrial activity has carried on decreasing the offer of vehicles available something that has affected the creation of new clients. Despite this, operating leases have continued to grow in stock, gaining importance in total registrations and although at a slower pace, they have added new clients.
These parameters show that operating leases have consolidated as an aspirational business model and that in a normal situation without shortage of vehicles, we would return to higher growth rates as appetite for operating leases is still active".
